

Publish Data to IBM Cloud

Team ID	PNT2022TMID033070
Project Name	Smart waste management system for metropolitan cities

Step 1: In the python script give the IBM credentials like org id, device type, etc. to connect to IBM cloud

Step2: Open your cloud account and open Watson platform

Step 3: In the specified Device Type mentioned in python script shows connected

Step 4: Then click on Recent Events and observe the Output data

Screenshot:

The screenshot displays the IBM Watson IoT Platform interface for a device named BIN1ID. The left sidebar contains navigation icons and a list of options: Connection Information, Recent Events (selected), State, Device Information, Groups (with a 'beta' tag), Metadata, Diagnostics, Connection Logs, and Device Actions. The main content area is titled 'Device Drilldown - BIN1ID' and includes a 'Back' link. It is divided into three sections: 'Recent Events' showing a live stream of data with two entries for an IoTSensor; 'State' showing a table of data points for 'dist' and 'load'; and 'Device Information' with an 'Edit Device Information' button.

Device Drilldown - BIN1ID

← Back

Recent Events

The recent events listed show the live stream of data that is coming and going from this device.

Event	Value	Format	Last Received
IoTSensor	{"dist":47,"load":12}	json	a few seconds ago
IoTSensor	{"type":"Buffer","data":[34,97,108,101,114,116,...]}	json	a few seconds ago

State

This table shows a list of data points that are reported by this device.

⚡ Showing Raw Data | No Interfaces Available

Property	Value	Type	Event	Last Received
dist	47	Number	IoTSensor	a few seconds ago
load	12	Number	IoTSensor	a few seconds ago
